## Introductory.

E TAKE PLEASURE in presenting to our many friends our new General Catalogue, again enlarged and improved. We were highly gratified at our success last season, and take this opportunity to thank all our friends for their liberal support, kind words and letters. Almost without exception the expression is, in substance: "We have at last found a place in Texas, where for the same money, we receive larger and better plants, delivered in less time and in better condition, than from any northern firm." To meet the rapidly increasing trade, we have built more greenhouses in Fort Worth, and opened a branch house in Dallas. Last year we boasted of having the largest greenhouse establishment in Texas. We are striving now to so improve it that it shall be second to none in the country.

For our peculiar Texas climate we cloubt if a better list of plants can be found anywhere than the one in this catalogue. Every season we try the novelties, discarding the inferior ones and retaining and offering only the best. Many desirable varieties have been introduced during the last few years. This is especially the case with roses, geraniums, chrysanthemums, plums and grapes. That we keep pace with the times is shown in the fact that at the Texas State Fair at Dallas, October, 1888 , we received sixteen premiums, including the first Sweepstakes for Best Collection of Plants and first Sweepstakes for Best Collection of Cut-Flowers. Above were awarded over thirteen other exhibitors.

## PLANTS BY EXPRESS.

We do not ship plants by mail in Texas, where we have such excellent facilities for shipping by express. By express we can ship much larger plants, without shaking all the dirt from the roots, so that when they arrive at their destination, they are as fresh and healthy as when first taken from our greenhouses. Still it takes considerable advice and reasoning to induce customers to order their plants shipped by express when they themselves have to pay the express charges, whereas if the plants come by mail the florist must prepay the postage.

To overcome this difficulty, namely to sell large, healthy plants, delivered at your homes, for the same price at which you can get the small "mailing" size,

We except all plants in pots. Of course this offer does not include Flower Pots, Hanging Baskets, Vases, etc.

## REASONS WHY YOU SHOULD BUY FROM US.

First. A glance at our Catalogue will show that we have as good an assortment as most of the leading florists in the United States.

Second. These plants are mostly varieties adapted to this climate.
Third. They have a more natural and healthy growth, not being forced by a contimuous fire heat during the winter, as is the case in the north.

Fourth. Our prices are as low as those of any other first-class firm, and
Fifth. You receive them free of express charges, and only a few hours after they leave the greenhouses.

## TERMS, CASH WITH ORDER.

Explicit Directions should be given for marking and shipping, giving the name in full, town, county and state. If the nearest express or frelght office is different from the post office, it should be stated.

How to Send Money. Remittances should be made by Money Order or Registered Letter on Fort Worth, or draft on Fort Worth or New York. If private checks are sent, add 25 cents for collection.

Orders Should be Plainly Written on a separate sheet (use our blank order sheet), and not included in the body of the letter.

To parties who may visit our city, we extend a cordial invitation to call at our place of business on Main Street, or at the nursery in "Sylvania," and examine our stock.

## CLUB OFFERS.

Combine Your Orders. Although our prices are extremely low, considering the quality of plants furnished, yet we offer the following additional inducements to persons who will exert themselves in our behalf by soliciting their neighbors to unite with them in ordering plants of us, and thus increase the amount remitted.

Packing Club Orders. Each person's order will be selected as desired and tied separate, so there is nothing to do but deliver the bundle.

Club Orders are shipped in one lot to the originator of the club.

| For $\$ 10.00$ | plants to the |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| " | 15.00 | $"$ | $"$ | 18.00 |

## ROBERT DRUMM \& CO.

BRANCH, Dallas, Texas.

Successors to Drumm \& Baker Bros. Fort Worth, Texas.

## Greenbouse Department.

## NEW ROSES OF SPECIAL MERIT.

These are all valuable, and tested sufficiently to establish their claims fully.

## METEOR.

The darkest red Hybrid Tea rose yet introduced; the color is a dark deep velvety crimson (no purple tinge to it, as is the general rule among its class); a constant bloomer, retaining its color a long time. 20 cents.

## MAD. SCHWALLER.

A great bloomer, producing quantities of large, fine pink blooms; shape like a Hybrid. 20 cents.

## MRE. JOHN LAING.

A fine rose, especially recommended for bearing; very fine shape and delicious fragrance; color a beautiful soft pink; a great bloomer. 30 cents.

## QUEEN OF QUEENS.

With blush edge, large and of a perfect form; very full. A true Perpetual; every shoot brings a rose. Splendid for the garden. 35 cents.

## PAPA GONTIER.

Extra large, finely formed buds, and flowers full and fragrant and of a beautiful brilliant carmine, changing to pale rose; reverse of petals fine purplish red. 15 cents.

## PURITAN.

A splendid white rose "producing hybrid flowers on an everblooming bush." 25 cents.

## SUSANNE BLANCHET.

An elegant bedding variety. Flesh salmon, shaded with salmon rose and white. A grand rose. 20 c .

## SOUV. VICTOR HUGO.

Bright China rose, with copper yellow center, ends of petals suftused with carmine. A charmingly beautiful combination of coloring. 20 cents.
SOUY. GABRIELLE DREVET.
Salmon pink, with center of coppery rose; of good size and fine form. Very satisfactory in habit, growth and freedom of bloom. 20 C .

## SOUV. THERESE LEVET.

 (New Red Tea Rose.)Color clear scarlet, shading darker; flowers remain in halfopened condition for a long time : will prove valuable for summer flowers.

VISCOUNTESS FOLKE-

## STONE.

A beautiful pink Hybrid Tea "rose. 25 cents.

PRINCESS BEATRICE.
A new and beatiful rose; very free flowering; pale yellow, center golden yellow, petals edged with jink. 25 cents.

PRIMROSE DAME.
A fine rose of good form and habit ; color, apricot crimson and white, forming a beautiful contrast. 20 cents.

## - ROSESに

THE ROSES OFFERED in this catalogut are heally y young growing plants in two and three-inch pots. Most of them will commence blooming as soon as planted, and continue in bloom the whole season. All classes of the rose grow to perfection in Texas, and anyone, by spending a dollar or two, can have an abundance of bloom from February to December.

Roses delight in rich soil, plenty of water, and good cultivation. They should be pruned severely every season to produce the finest flowers.

We can supply large plants from the open ground of nearly all the varieties named below, until March I5th. As we grow the small roses in pots, they can be shipped and transplanted at any time. We would advise our friends, however, to plant early, so that the roses, can become thoroughly established in the ground before the dry weather sets in.
Plants from two-inch pots, except where noted, 10 cents each, $\$ 1$ per dozen; three-
inch pots, 20 cents each, $\$ 3$ per dozen; large plants from open ground, 35 cents each.

## EVERBLOOMING ROSES.

ENDER THIS HEADING we class the Tea, China and Bourbon Roses. They will all bloom as long as they grow; so to have flowers cominually they should be kept in a growing condition all spring, summer and fall. In this way beautiful roses can be gathered from February to December
Adam. Good; carmine pink; large and donble; delicious tea scent.
Archduchess Isabella. White, shaded rose; a good bedder ind constant bloomer. 15 cents.
Agrippina. Rich velvety crimson, beautiful in bud. For bedding it is unsurpassed. Archduke Charlcs. Briltiant crimson scarlet, shaded with violet crimson; splendid.
Appoline. Clear pink ; extra fine rose; grows with remarkable vigor, and is very hardy.
America. A large, fine flower, best in bud; dark, creany yellow, changing to coppery or orange yellow; strong grower; suitable for trellis or pillar.
Aurora. Beautiful rosy blush.
Bourbon Queen. A splendid rose; large, fine form; very double, full and sweet; bright carmine, changing to clear rose, petals edged with pure white.
Bon Silene. Noted for the size and beauty of its buds, which are a rich deep rose; not double when full blown, but highly esteemed for its rich color and beautifully formed buds; very sweet.
Bella. Pure white; pretty pointed buds.
Crimson Bedder. Rich dark velvety crimson.
Cornelia Cook. Beautiful creamy white; buds of immense size and very double; sometimes does not open well, which is its weak point.
Comtesse Riza du Parc. A finely formed, highly colored flower; coppery rose, heavily shaded with carmine; fragrant and vigorous.
Charles Rovolli. Pure rose color; soft and pleasing. 15 cents.

Mrs. Juhn Laing. (Sorpage.3.)

Catherine Merm.
Catherine Mommet. A beautiful variety, of bright flesh-colored rose; flowers large, full and globular, very double and sweet. A first class rose in every respect.
Coqnette de Iyon. Sometimes called "Yellow Hermosa." Pale yellow, free bloomer. Cramoisi Superieur. Medium size; rich dark velvety crimson; very double, full and beautiful; compact growth; one of the best for bedding.
Donglass. Dark cherry red, rich and velvety; large, full and fragrant; desirable.
Doetor Berthet. Beautiful silvery pink, brightening at center to deep carmine, passing to rosy crimson; fine large flowers, very double and sweet
Devoniensis. (Magnolia Rose.) Beautiful creamy white, with rosy center; large, very full and double, delightfully sweet Tea scent; one of the fmest Roses. 20 cents.
Dueliess de Brabant. Soft rosy pink; petals edged with silver.
Etoile de Lyon. Beautiful chrome yellow, deepening at the center to pure golden; flowers large, donble and full. I5 cents.
Gloire de Rosamond. Rich velvety crimson, flamed with scarlet ; full medium size.
Hermosa. Liglit pink; large, full and double; grows freely and blooms very profusely.
Homer. Rose, center salmon.
Isabella Sprunt. Bright canary yellow; large, beautiful buds; very sweet tea scented.
Lonis Phillippe. Dark velvety crimson.
La Pactole. Creamy yellow center; very free flowering; a beautiful rose.
La Princess Vern. Flowers large and full, perfectly double; color creamy white.
Mad. Lambard. Salmon pink, shaded deep rose.
Mad. Bravy. Rich creamy white, with blush center; of perfect form.

Mad. Camille. Of large size, double and full ; immense buds of delicate rosy flesh, changing to salmon rose, elegantly shaded and suffused with deep carmine; fragrant.
Mad. Welche. Beatiful amber yellow, deepening towards the center to orange or coppery yellow; extra, large, fine globular form, very double and full. 20 cents.
Mad. C. Knster. White, orange yellow center,
Mad. Joseph Seliwartz. White, beautifully flushed with pink and cream; of medium size, cupped and borne in clusters; one of the hardiest for out-door bedding. 15 cts .
Mad. Falcot. Apricot yellow ; flower of medium size and fullness, but beautiful in bud.
Mad. Russell. Creamy white, shaded with pink.
Mad'lle Rachel. A lovely tea rose; pure show white, very double and deliciously scented; makes beautiful buds; is an elegant rose for either house or open ground.
Marie Ducher. Rich transparent salmon, with fawn center; large, double and sweet.
Mad. Brest. A dark rosy red; double and large.
Mad. de St. Joseph. Fawn, shaded salmon: large, full, sweet-scented; fine.
Mad. Margottin. Deep citron yellow, center rosy peach; large, very full and globular.
Marie Gmillot. Perfection in form ; the flower is large and double to the center; grows well and is healthy; pure white when fully open.
Marie Van Hontte. Of a lovely pale yellow color, with the outer petals suffused bright pink, and the inner ones edged rose ; large, full, fine of form. 20 cents.
Niphetos. Pure white, fine buds; a poor grower out-doors, but good for pot culture.
Perle des Jardins. The finest and most popular dwarf yellow rose in existence. Flowers canary yellow, often golden yellow; of the most beautiful form, and large.
Pink Daily. Clear bright pink; medium size; free and double; fragrant.
Queen of Bedders. Very rich, dark velvety crimson; very free blooming, flower compact and full ; one of the best crimson bedders ; a grand sort. 20 cents.
Regnlus. Large perfect form, full and double; carmine, with purple and rose shading. Safrano. Bright apricot yellow, changing to orange and fawn, sometimes tinted with rose ; highly valued for its beautiful buds; exceedingly profuse in bloom.

Souv. de la Mamaison. The flower is extremely large, quartered and double to the center;flesh white. 15c. Sombrenil. This magnificent variety has immense finely formed flowers of a bedutiful white, tinged with delicate rose.
Sonvenir d'un Ami. Fine delicate rose shaded with salmon; very large, full and double; exquisitely fragrant.
Sunset. A sport from Perle des Jardins, which it closely resembles except in color; the color is a remarkable shade of rich golden amber. elegantly tinged and shaded with dark ruddy copper; intensely beautiful; with us has not proved as vigorous a grower as its parent. 25 c .
The Bride. The new white Tea rose that has become so popular. We consider it among the few new roses worth planting in the South. It is of unusually fine form, being a sport from Catherine Mermet. is cents.
Vallee de Chamounix. Coppery vellow, tinged with rosyblush. 20 cents.
William Feaneis Bennett. A new rose; valuable for winter forcing, but almost useless for out-door culture. Dark crimson; large and beautiful in bud. 15 cents. White Tea. Same as White Daily; pure white; a constant and profuse bloomer ; fragrant and desirable.

## HYBRID PERPETUAL ROSES.

THIS CLASS is not so popular in the South as the Everblooming kinds, yet some of them excel all other classes in size of flower and richness of color. They bloom profusely in their season, and some varieties produce also a few fine flowers later. The shades of crimson in this class are especially fine; but so far no varieties of a yellow tint have been produced in Hybrid Perpetuals.
Amma de Diesbach. Clear rose; fine color; large and slowy.
Baroness Rothschild. The form of this rose is absolnte perfection; it is globular in shape, the petals cnrved and of waxen texture; flowers large, with satiny finish and of a very pleasing shade of delicate but decided pink. 25 cents each; large plants, 75 cents.
Belle de Normandy. Beautiful clear rose, shaded and clouded with rosy carmine and wo lilac; very large and sweet.
Captain Christy: Delicate flesh color, shaded rose to center ; a large, finely formed flower.
Caroline Goodrich. Rich velvety crimson.
Gabriel Toumier. A fine free blooming rose; light crimson, sladed deep rose.
Earl of Pembroke. A strong grower; very soft, velvety crimson, enlivened on the edge of petals with bright red. 20 cents.
General Jacqueminot. Bright crimson, exceedingly rich and velvety; the buds and partially expanded flowers are very: fine, and fairly glow with deep rich coloring.
General Washington. Rosy carmine, sladed scarlet; very brilliant and glossy; double and of good form.
Giant of Battles. Brilliant crimson ; large, full and well formed.
John Hopper. Fine bright rose; flowers very large, cupped, full and well formed.
La Reine. Beantiful clear bright rose ; very large.
Mad. Plantier. Pure white flowers in clusters; summer bloomer.
Mabel Morrison. Of excellent habit and a very free bloomer; petals thick and of a soft, smooth texture, shell-shaped; very donble and ronnded in form ; of the purest white, and almost velvety in its finish. One bloom, with its foliage, is a bouguet in itself. Large plants, 75 cents.
Mad. Nifred de Rougemont. Pure white, with light rose shading; flowers not very large, but full.
Mad. Chas. Wood. Rosy carmine, sometimes darker; large and double to the center; of open form.
Magna Charta. Pink, suffused with carmine; full and globular. One of the very finest.
Mad. Masson. Reddish crimson; large and double; a good bloomer. 15 cents.
Mad. Rivers. Clear pink; very full and sweet.
Mervielle de Lyon. White, sometimes slightly tinted flesh; very large and double. One of the best white roses grown, and always a favorite in its beauty. Large plants only, 75 cents.
Prince Camille de Rohan. Dark crimson maroon, very rich; moderately donble ; of good habit and fine in bud, but a shy bloomer.
Panl Neyron. Pink; very large; one of the best of this class, and probably the largest rose grown.
Prince of Wales. Rich crimson; a vigorous and good bloomer, of rich coloring. 20 cents.
Pins IX. Clear bright rose, changing to rosy pink, delicately shaded; very large, fragrant and desirable; has been popular for many years.

## HYBRID TEA ROSES.

THIS CLASS of roses is the result of a cross between the varieties of Hybrid Perpetuals and 'reas. The great advantage clamed for them is that they combine the free flowering qualities of the Tea class with the rich coloning and to some extent the hardiness of the Hybrid Perpetuals. Some varieties of Ame value are in the section.

Americanliseauty.

Resembles La France in shape, size and freedom of bloom, but is of a deep shade of rose. The growth is also different, being quite robust, and the flowers are garnished by leaves close to them. 20 cents.
Beanty of Stapleford. Flowers large, clouble, and handsomely formed; bright piuk, shading gradually tuward the center to deep rosy car. mine. 15 cents.
Ia France. Well known; perhaps the best rose in existence. "For the few who do not already know it, we will say it is of extra size, extra double and of superb form. No rose can surpass it in delicate coloringsilvery rose, shaded with pink: in fragrance it is incomparable: in form, perfect. The sweetest and most useful of all roses."
Antoine Verdier. Bright glowing pink, beautifully shaded with rich crimson; large and globular, very full and sweet; a constant and profuse bloomer.
Dnke of Connaught. Buds extra large, very full and fragrant; long and finely formed; brilliant scarlet.
Pearl. Rosy flesh, of medium size, full; has pretty buds; an elegant sort. 15 cents.
Triomphe d'Angers. Bright, fiery red, changing to darkest velvety crimson, tinged with purple. 15 cents.

## POLYANTHA ROSES.

Anna Marie de Montravel. A beautiful pure white rose; very double, perfect flowers; very sweet.scented; a real little gem. 15 cents.
Little Pet. P'ure white flowers; always in F. bloom; very pretty. 15 cents.

M'ile Cecile Brmmer. Quite distinct from the others, and very pretty, winh slender salmon colored buds, heavily shaded with rose; the buds are the true tea rose form, distinct from others of this class.
Mignonette. Its color is clear delicate rose, with a frequent and peculiar intermingling of white that makes it unique and pleasing; blooms in large clusters, and is very beautiful.
Perle d'Or. A beautiful yellow variety of this much prized class of roses. Like the rest of the class, it is of dwarf habit, and very free flowering. It blooms in clusters, often numbering from thirty to forty flowers each. Color of buds beautiful nankeen yellow, with vivid orange center, each petal tipped white, changing to rose. 20 cents.

Polyantha Rose.

## CLIMBING TEAS AND NOISETTES.

Chromatella or Cloth of Gold. Golden yellow; fragrant, large and beautiful; 20 cts . Gloire de Dijon. One of the finest roses grown. It is noted for the great size of its flowers, its delicate tea scent, and its exquisite shades of color, being a blending of amber, carmine and cream. 15 cts.
Lamarque. Flowers of medium size, borne in large clusters-established plants bear thousands of blossoms; pure white, double.
Marechal Neil. A beautiful deep sulphur yellow, very full, large and exceedingly. Sweet. It is the finest yellow rose in existence. It has a climbing habit, and when allowed to grow until it attains a large size. as it will in a few years, it yields thonsands of beantiful flowers. Large budded plants, \$i each; smallerplants, 10 to 25 cts.
Mad. Alfred Carriere. Flesh white, with salmon yellow at the base of petals.
Reine Marie Henricte. Brigist cherry red, of a pure slade; a strong, vig. orous grower.
Climbing Hermosa. Same as Hermosa, but of climbing habit.
Reine Olga de Wurtemberg. Large, full and fine ; rosy hesh, delicately tinged with samon yellow, petals margined with crimson; blooms in clus-
 ters.

Marechal Neil.
William Allen Richardson. Orange yellow, outer petals lighter; center copper yel-
very rich.
Washington. Of medium size; pure white, very double; blooms profusely in large
Woodland Margaret. grower, suitable for trellises, etc.; quite hardy.
Woodland Margaret. White; vigorous.

## HOW OUR PLANTS PLEASE.

The fowers came in fine condition. I am delighted with them. The extras are lovely The extras are lovely
MRS. T. L. ODEM.
El Paso, Texas, April ib, is88.
My last order arrived safely, and gave full satisfaction, the plants growing right straight along. Many thanks for the gifts that you added.

MRS. ELIZABETH HEIDERHOFF.
Chappell Hill, Washington, Co., Texas.
1 did not know of your firm sooner, for thew send you another order. 1 am so sorry that I did not know of your firm sooner, for the plants that I have received from the north are so slow getting started off. Many thanks for the extras. One of them is blooming beautifully.

MRS. FANNIE A. LIDE.

Type of the Newer Double Gerauinms.

## GERANIUMS.

NO CLASS of plants has yet been tound to take the place of the Geranium. There has been so much improvement in them in the last few years, that they now can be had in all the shades of scarlet, crimson, pink, salmon. white and striped. They are indispensable in any collection of plants, either for pot culture or for bedding out. For bedding out we recommend the solid darker shades, especially the single scarlets. They glory in the hottest sun, and will stand considerable drouth. They stand the hot sun of the South better than any other class of plants. They produce more flowers and make a better display in whatever place they are grown, than anything that could be grown in a similar place. All who saw our brilliant beds of Geraniums last summer, were surprised to learn they had never been watered.

## PRICE OF GERANICMS.

Except where noted, named varieties, vigorous, healthy plants, 10 cents each,
$\$ 1$ per doz.; assorted, unnamed varieties, 75 cts. per doz., $\$ 5$ per 100 ; plants
from three-inch pots, 15 cents each, $\$ 1.50$ per dozen; large bloom-
ing plants in five to seven-inch pots, 25 to 50 cents each.

## DOUBLE FLOWERING GERANIUMS.

Asa Gray. Light salmon pink; dwarf; very free flowering and an excellent bedder. $\$ 6.50$ per 100 .
Aba Perfecta. White, tinged pink.
Amazon. White.
Apple Blosson, Rosy salmon pink.

Rolst. George. Deep crimson scarlet; large.
Stanislans Malingre. White and pink.
The Bhonde. Bright salmon and pink.

## SINGLE FLOWERING GERANIUMS.

Anna Seott. Deep crimson, shaded maroon.
Anrora Borealis. Orange flame color.
Bamford's Glory. Bright clear scarlet.
Bishop Simpson. A very large variety, with large trusses of rich salmon flowers.
Clement Bontard. Flesh colored.
Celestial. Rose, tinged with white.
Cychope. Largetrusses; white, shaded salmon, orange center.
Cosinos. Salmon and orange. 15 cents.
Genome. Soft bright scarlet.
Gen. Grant.i Dazzling scarlet, large truss, one of the best. \$6 per too.
Gen. Sherman. Bright scarlet.
Kate Patterson. Beautiful clear salmon orange.
Miss Blanehe. Deep purplish pink.
Mis. J. Anthony. White, with rosy salmon.
Mrs. Garfield. White.
M. Chevrenl. Bright amaranthine red.

Mary Halloek Foote. Clear pale salmon, with large white eye.
New Life. Bright scarlet, striped with white.
Neve. White.
Pres. Simon. Bright clear red.
Pres. liazier. Rose and pink.
Pabelon. Scarlet.
Queen of the West. Bright orange scarlet; has large trusses and is a profuse bloomer. We know of no finer Geranium for planting out in beds.
Streak of Imek. A rival of New Life. Salmon, streaked with white; dwarf, but a most profuse bloomer.
Scarlet Bedder. This, like our "Double Red," is not a distinct variety, but a collection of the best single scarlets, selected from the best and healthiest beds, regardless of names. They are all well grown healthy plants. 75 cents per doz., $\$ 5$ per 100 .

## GERANIUMS, INEW :VARIETIES.

We take great pleasure in offering the following collection of Geraniums, knowing that for profusion of bloom and size of flowers they are unsurpassed. Some of the newer varieties are im. mense. The following are selected from the latest European importations, and the cream of recent American novelties.

## 15 cents each, $\$ 1.50$ per dozen, except where noted.

## NEWEST DOUBLEGERAN. lams.

Baron de St. Dedier. Orange, bordered white ; large truss of finest form.
Ct. Turati. Large truss; very large round fiorets ; bril liant flame color. Desirable.
Contre-Amiral Knoor. Cherry, shaded with lilac, upper petals distinctly marked with orange. A first class sort.
Contraste. Flowers and trusses very large; lower petals orange and carmine, upper and center
petals clear orange, making a contrast of colors that is very beautiful. 20 cents.
Edward koch. Flowers very large, brilliant cinnabar color at the center. Very beautiful and one that is valuable
Esperanec. Flowers full and of the same beautiful color as rose "Malmaison," with a salmon center. A beautiful variety
Fratelli Ferrario. Bright orange apricot color. A variety that we can recommend highly.
Gen. de Conrey. Enormous sized spherical trusses, flowers very full; brick red in the center, changing to a salmon rose, marked with white. 20 cents.
Giorie de France, Large round florets. of waxy appearance; colors carmine and white, with carmine center; each petal delicately edged with carmine. An excellent pot variety, to which its habit is finely suited-a fine sort in every way. 25 cents.
Jules Lartigue. Flowers semi-double; upper petals carmine, lower violet lake; plant a vigorous grower.

New Double Geranum, White Swan.
Heros d' Usagara. Orange cimamon ; beatiful form.
Les Hugnenots. Trusses large ; florets very double, silvery lilac.
Mad. Guillot. Color a very distinct and beautiful China rose. 20 certs.
Mad. Guilbert. Very large florets, borne in immense si\%ed trusses of a very beatutiful pure rose color. An extra fine Geranium.
Marvel. Dark crimson maroon.
Mad. Hoste. Color flesh, shaded white and salmon. One of the finest geraniums in caltivation, and of very rich effect. 25 cents.
Progression. A strong growing variety, bearing trusses of well formed flowers, of orange scarlet, on the style of Joalousy; very distinct.
Palmyre. Immense sized trusses of well formed white flowers; a fine bedder and a good geranium.
Princess Ditailly. Very dark amaranth, bordered with maroon, upper petals marked with purple.

## ALOES.

A valuable class of plants for rock work in summer, or the house in winter. $2 \bar{j}$ cts.

## ASPARAGUS GENUISSIMUS.

An elegant evergreen climber from South Africa, with slender, smooth stems and numerous spreading branches. A handsome ornamental plant; its plumy, feathery growths are very useful for decoration. 20 cts .

## ALOYSIA CITRIODORA.

## (Lemon Verbena.)

A favorite garden plant, with delightfully fragrant foliage; fine for bouquets and for spreading through linen presses. We never yet met a person who was not fond of its aromatic fragrance. It attains a large size in a single season; may be wintered in the cellar, not allowing it to become absolutely dry. Grows well in almost any.soil. 15 cts .

## ALTERNANTHERAS.

Beautiful dwarf plants of compact habit, growing about six inches high, and admirably adapted for edgings to flower beds or ribbon lines their beautifully variegated foliage of crimson, purple, yellow, pink and green, forming rich masses of color, always attractive and highly ornamental. We grow thousands of Alternantheras, because they do so well in this climate, and are certain to give satisfaction wherever planted. A bed of Alternantheras forms a perpetual carpet of bright colors.

10 cents each, 75 cents per dozen, $\$ 4.50$ per hundred.
Aurea Nana. Bright golden yellow, holding its color well the entire season. Amoena Spectabilis. Crimson, pink and brown; the finest. Versicolor. Foliage ovate ; olive, crimson and chocolate; when used for edgings they must be frequently sheared; the young tips will then assume the most brilliant hues.

Tesselata. Evenly margined with green and yellow : strong grower.
Verschaffelti. Rich velvety crimson; one of the best for bed. ding out.
Zebra. Yellow, crimson and green streaked; striking.

Comte de Germiny.

## CHRYSANTHEMUMS.

WITH THE exception of the rose, no flower has ganed so extensive a popularity as the Chrysanthemum. Never in the history of any fower has so much interest been manifested as there is in this flower of to-day. The Chrysanthemum is the people's flower, as it appeals directly to the heart, and bears but slightly on the purse.

Our list is the largest and most complete to be found anywhere in Texas. It contains none but good varieties, and embraces the best of the old varieties that were popular many years ago, together with the best and newest varieties of the past two years.

Always plant Chrysanthemums in an open spot where they will have sunshine each day. Make the soil rich with manure or bone dust; licpuid manure may be given occasionally. Stake each plant, tying it loosely, so that the wind will not injure the branches. Pot-grown plants delight in great quantities of water. If for bloom indoors they should be lifted about the ist of October and potted. Set in a shady place for a few days after thoroughly drenching with water. Afterwards expose them to the fult light, but do not keep warmer thim fifty degrees.

10 cents each, $\$ 1$ per dozen, except where noted; one hundred, in a hundred different varieties, $\$ 6.50$.

## JAPANESE VARIETIES.

The following list has no "chaff" in it, but includes the very best varieties, both of American and European origin. We shall be glad to make selections for our friends who are unacquainted with the sorts.

The Japanese varieties are, of course, the most variable in form and coloring, and are perhaps the most admired. The list of varieties we ofler has been selected as the most distinct.

Pearl Tuberose

## GRADESCANTIA.

The following varjeties of Tradescantia (often called Wandering Jew) have beautifully marked foliage, and are fine for hanging baskets and vases, or for house culture, as they will endure almost any hardship if liberally supplied with water. Zebrina. Leaves dark green, with a silvery stripe. 10 cents.
Multicolor. Beautifully striped with white, crimson and olive green ; sometimes sports.
io cents.

## VERBENAS.

The Verbena is too well known to need any recommendation. It commences to flower and spread from the first day the plants are set, until late in the antumn, every day beconing better and handsomer. If Verbenas are pegged down to the ground as they grow, the plants will extend rapidly, and afford a much greater amount of bloom than' if allowed to grow up, when they become "straggling." There are several hundred varieties in cultivation, from which we have selected the following list as being vigorous growers and free bloomers. Chis list contains the cream of the old varieties, the Mammoth strain (of which the individual flowers are each as large as a twenty-five cent piece), and the latest introductions.

## 10 cents each, 75 cents per dozen, $\$ 5$ per 100.

market peaches. July zoth to zoth. market peaches. July zoth to 3 oth.
Crofts Golden. (Cling.) Very large; deep sellow with crimson cheek; flesh yellow, sub-acid. August ist to roth.
Chinese Cling. Very large, specimens often measuring fourtcen inches in circumference. Usually a shy bearer, but of superior richmess and flavor.
Duffs Yellow. (Cling.) Very large; yellow, with red wash; juicy, sub-acid; showy
fruit. Juty th. fruit. July 10 th.
Early Rivers. Pale straw, with a delicate pink clieek: one of our finest peaches for home use, but too tender to shiplong distances; targe, delicious and prolific. June roth to 20th.
Elberta. Large; yellow, with red cheek; juicy and high flavored; flesly yellow. An excellent shipper. Middle of July.
Early York. Large; white, with red cheek, striped with red. Productive; flesh white, melting and juicy. July ioth.
Fleitas or Yellow St. John. Large, roundish; orange yellow, with a deep red cheek; juicy, sweet and highly flavored. June 15 th to 25 th.
Foster. Large; highly recommended; much like Early Crazeford, of which variety it
is supposed to be a seedling. Ripens tenl days before the Early Craterd is supposed to be a seedling. Ripens ten days before the Early Crawford.
Gov. Garland. Fruit medium, handsome; striped or marbled with yellow; flesh thick, white, fine grained, juicy, tender, melting, sweet; very productive. Ripens with
Alcxander. Alexander.
Great Eastern. Very large, often measuring if inches; greenish white with a slight wash of red; flesh juicy and and sweet, sometimes a little coarse; a showy fruit. July 20 h . 50 cents each, $\$_{5}$ per dozen.
Honest John. Large; yellow, with red cheek; an excellent peach, of fine flavor; freestone. A good market sort. July ioth to 2oth.
Honey. Medium, oblong, with a sharp, recurved point ; creamy white, washed and mottled carmine; flesli of a peculiarly fine texture and a honey sweetness; tree very thrifty. A distinct grower and prolific. Ripe about June 25 th.
Hale's Early. Of medium size, with red cheek; flesh white, melting, vinous, and very good. One of the best bearers, seldom missing a crop. June 5th to 15 th.
Henrietta. Large; yeliow, crimson cheek; showy; very productive. Clingstone.
Heath Cling. Large; skin creamy white, very seldom any red; flesh pure white to the stone, juicy, sweet, and of good aroma; popular for preserving. Ripens about the
last of August. tast of August.

Schumacher Peach.
ludian. Large; dark claret, with deep red veins, downy; Hesh deep red, very juicy; vinous and refreshing. Middle of August.
Jacques' Rareripe. Superb yellow; productive, ripening with Crazoford's Late. Freestone.
Lord Palmerston. Very large; beautiful creamy whita, with a blush cheek; of rich flavor and firm, but melting flesh. August 20th.
Leopold. (Cling.) Large, yellow; of fine flavor and very productive. August ist to ioth. 50 cents each, $\$ 5$ per dozen.
Mountain Lzose. Fruit large; skin white, nearly covered with brilliant crimson; flesh white, melting, sweet, and delicious flavor. Ripe about Jnne 25th. One of the most valuable of early varieties.
Muscogee. Size large; skin dingy yellow, nearly covered with crimson, with a red and dark brown cheek, spotted and somewhat striped like the Columbia; flesh white, with some red veins around the stone. Melting, juicy and very good. Beginning of Augnst.
Newington Cling. Large, oblong; white, slightly tinged with red and red cheek; flesh firm, juicy and well flavored. August roth.
Old Mixon Free. Large, nearly round; creamy white, with red cheek; juicy, sweet and well flavored. Last of July.
Old Mixon Cling. The most profitable clingstone grown at this time of ripening. Fruit, large oblong; a wonderful bearer. July 24th to August 5th.
Osceola. Large; golden yellow, with orange cheek and a few red veins; flesh golden yellow, sweet, buttery and with an apricot flavor. Beginning of September. Freestone.
Pine Apple. Skin golden yellow, tinged with dark red; flesh yellow, slightly red at the stone, juicy, sub acid, excellent. August. $5^{\circ}$ cents.
Picquet's Late. Very large: yellow, with a red cheek; flesh yellow, bnttery, rich, sweet and of the lrighest flavor. Maturing from end of August to middle of September Freestone
Stonewall Jackson. A seedling of the Chinese Cling. Flesh melting, juicy and of high flavor; oblong ; creamy white, with crimson wash. Clingstone. July
Steadley. Large, greenish white; of good quality and productive. August $25^{\text {th }}$ Freestone.

Susquehanna. A very large, noble fruit: skin deep yellow, with bright red cheek; flesh yellow, juicy and high flavored. End of July.
Schumaeher. A very early peach of the Alexander type, and closely resembles it Medium to large; brigit yellow, with crimson cheek.
Stump the World. Large: white, with bright red cheek; flesh white, juicy and of good flavor; stands carriage well, and is a fine market variety. July 20 th.
allie Worrell. Flesh white, juicy and of a delicious flavor; tree a vigorous grower and good bearer. A fine market sort ; freestone. September.
Tuskina. Above medium, oblong; skin yellow and deep orange red; flesh sub-acid, vinous and good. Clingstone.
Thurber. A seedling of the Chinese Cling, Originated by Mr. P. J. Berckmans of Georgia, who claims for it all the good qualities of the parent with the additional nerit of being a freestone of large size. End of July.
Wager. Very large; yellow, more or less colored on the sunny side; jnicy and of fine flavor. July.
Waterloo. Medium, red; very sweet. First of June.

## APPLES.

## Except where noted, 20 cents each, $\$ 2$ per dozen, $\$$ me per xoo.

Early Harvest. Of good size, bright yellow; tender, juicy, well flavored; a fine market apple. Ripens June ioth and lasts two weeks.
Red Astrachan. Large, roundish; nearly covered with deep crimson, having a thick bloom like a plum ; jnicy, rich, acid. June.
Red June. Deep red, juicy and very productive. Ripe June isth to July
Yellow Horse. Large, yellow, acid; fine for cooking and drying. Ripe June and July.
Summer Qucen. Large, striped, excellent, productive; bears young and abundantly.
Summer Pearmain. Dull red; delicious, good bearer, hardy. July.
Maiden's Blush. Of medium size, clear yellow and red: juicy, tender and good.
Fall Pippin. Very large, yreenish yellow, delicious. First of September.
Twenty Ounce Pippin. Very large, yellow, showy. Middle of September.
Jonathan. Medium, red; very beantiful and excellent ; productive. October.
Ben Davis. Large, striped, showy ; most superb. Flavor moderately good ; firm keeper
Kentucky Red. Medium to large, handsome; good flavor.
Yeltow Belteflower. Large, delicious, popular; tree vigorous, spreading, hardy; a fine market fruit.
Smith's Cider. Medium, pale striped; flavor moderate.
Winesap. Medium, red, excellent ; hardy, early and a most prolific bearer.
Golden Pippin. Golden yellow; crisp, juicy, tender and of fine flavor. Keeps well.
Gravenstein. Large, excellent, vigorous; productive, thongh not a-sure bearer.
Shocktey. Ripens in October, and has been kept until the following August. Although this apple cannot be classed as first quality, yet it is the most popular winter valiety
Arkansas Black. A new apple from Arkansas. Large; dark red, nearly black; of fine flavor, and a valuable market and keeping variety; not tested. 50 cents each, $\$ 5$ per

## CRAB APPLEG.

## 50 cents each, $\$ 5$ per dozen.

Quaker Beanty. Yellow, sub-acid; bears well in Texas
Whitrey's No. 20. A large new early crab, fine for dessert and cooking.
Hyslop. Large; very handsome and popnlar; fruit deep red.
Transcendant. Large; very beautiful and popular; growth rapid and irregular ; a good bearer and valuable. Fruit yellow and red striped, with dark red cheek in the
Siberian Red and Yellow. Well known. Popular in Texas,
Tetofky. (Russian Crab.) Medium; whitish yellow with crimson stripes; of juicy tender and pleasant flavor; upright, moderate grower with large leaves; ; oftremely
hardy and valuable.

## PEARS.

## Exccpt where noted, 50 cents each, $\$ 5$ per dozen.

## SUMMER PEARE.

Bartlett. By far the most popular pear in Ainerica, and deservedly so for its size, beauty and free bearing qualities. Large, bnttery, melting, rich. July and August.
Clapp's Favorite. Large, of very good quality; showy and becoming quite popular; ripens before the Bartlett.

Kiefter Pcas.
Doyenne d Lete. Small, melting, very good; tree a moderate grower. Beginning to middle of June.
Flemish lieauty. Large, melting, sweet, handsome. August.
Howell. Medium; very rich and juicy; a good bearer and fine froit; tree an open grower. Begimning of August.
Osband's Summer. Small, very good, fine grower.
Seckel. Sinall but of delicious flavor; tree a stont, slow grower, August.

## AUTUMN AND WINTER PEARS.

Kieffer. Origin near Philadelphia, where the original tree, now sixteen years old, has not failed to yield a large crop of fruit for thirteen years past. Tree has large, dark green glossy leaves and is of itself very ormamental; is an early and very prolific bearer. The fruit is of fair quality, wonderfully showy and valuable for canning or market. This and the Le Conte will come into bearing two or three years earlier than than the old sorts. Four to five feet, 50 cents each, $\$ 5$ per dozen ; six feet and upwards, 75 cents each, $\$ 7.50$ per dozen.

Kelsey's Japan Plum.
Beurre d' Anjon. Large; juicy, melting, sometimes a little asţ̧ingent; finétree and regular bearer. August to September.
Duchesse d'Angouleme. Very large, melting, jucy and well flavored; sometimes weighs over a pound. Greenish yellow, with some russet ; does best on quince. Middle of September.
Le Conte. Fruit large, pyriform; skin smooth, pale yellow; quality very variable-usually of second quality, but if allowed to mature slowly in a cool, dark room or in drawers, its quality improves remarkably. Maturity from first to end of August. Trees begin to bear when four years old, and should be planted twenty feet apart ear $h$ way. Four to five feet, 50 cents each, $\$ 5$ per dozen ; six feet and upwards, branched, 75 cents eacli.

## PLUMS.

## Except where noted, 25 cents each, $\$ 2.50$ per dozen.

Caddo Chicf. Earliest ; fruit round, red ; tree prolific, holds its foliage late, and therefore should be transplanted in winter or spring. From Louisiana.
Clinton. Similar to Weaver. August.
De Soto. Large, round, dark purple; one of the best ; prolific.
De Caradene. Red, round, acid. June.
Blackinall. Tree resembles the peach; a fine grower, but a shy bearer.
Golden Beauty. Medium, yellow, round. From Western Texas. August.
KELSEX'S JAPAN. This plum is now conceded by all who have tried it to be the best late plum in America. Our trees fruited last season, and we can freely confirm all that is said in its praise. It has been in bearing in the United States since 1876 and the trees have never failed to produce all the fruit they could carry. The following points are clamed for it: "Its wonderful productiveness is not surpassed by any other plum, native or foreign. It comes into bearing at the age of three years. The fruit is a very large size, being from seven to nine inches in circumference, with a small pit ; specimens sometimes weigh six and a-half ounces each. Color rich yellow, nearly overspread with bright red, with a lovely bloom. It is of excellent quality, melting, rich and juicy. Its large size renders the parting of the fruit as practicable as the peach, and it excels all other plums for canning. As a dried fruit this is destined to take the lead, being equal to, if not surpassing the best dried prnnes. In texture it is firm and meaty, possessing superior shipping qualities. It ripens from the first to last of September." 50 cents each, $\$ 5$ per dozen.

Grcen Gage. Small, well liked where known; tree a good grower with us. Middle of July.
Lone Star. Large ; yellow and purple ; rich, melting and sweet; the best early plum; of dwarf, weeping growth; slould be transplanted late. Last of May.
Marianma. Tree a vigorous handsome grower; fruit, medium, red, sweet.
Miner. Medium, dark red; a good grower.
Newman. Medium, oblong; skin a beautifulglossy red color, with delicate purple bloom.
Prunus Simonif. Comes highly recommended, though it lias not yet fruited with us. Fruit good size, brick red, with a fine apricot flavor. 50 cents.
Robinson. We have tested this sufficiently to warrant us in saying it is equal to Wild Goose in every respect, with the difference that it ripens two weeks later, thus making it a most valuable market variety. With a good orcliard of Caddo Chief, Wild Goose, Robinson and Kelsey, you can supply the market with fine plums nearly all summer. 50 cents each, $\$ 5$ per dozen.
Weaver. Large, red; tree a good grower, but we fear a shy bearer.
Wild Goose. The "old reliable," Too well known to need description. It stands No mong plums where the Barllett does among pears and the Concord among grapes. No collection is complete without it.

## APRICOTS.

## 25 cents each, $\mathbf{\$ 2 . 5 0}$ per dozen.

Early Golden. Medium, pale orange; flesly yellow, juicy, sweet and good
Coorpark. Large size ; orange, brownish rcd in sun; flesh quite firm; juicy, with rich Inscious flavor.
California Black. More like a plum, and is probably a cross between the Apricot and Plum. Juise
Russian. Tree very hardy, though dwarfish in its habits. Not yet fruited with us.

## CHERRIES.

Black Tartarian. Very large; productive where it does well. May isth. 50 cents, Coe's Tramsparent. Medium sized, mottled. May 20 th . 50 cents.
Olivet. A new French variety. Fruit large and globular, with a very shining deep red color; flesh red, tender and vinous. 75 cents
Governor Wood. Large, yellow and red; excellent. June ist. 50 cents.
Garly Riehmond. Medium, red, early; hardy and proluctive; one of the best cherries for the south. 50 cents.
May Duke. Large, dark red; tree hardy, bears well, and is quite distinct. 50 cents.
Utah Hybrid. Fruit medium to large, rich reddish purple, and of uniform shape and size. As a table fruit, only fair in quality. Tree dwarfish; a sure and prolific bearer. A good market variety. 50 cents.

## QUINCES.

Orange or Apple. Large, orange shaped and of excellent flavor. 50 cents
Champion. The tree is a strong free grower, more like the apple than the usually comes into bearing the second or third size. \$i each, \$1o per dozen.

## NECTARINES.

:so cents each.

## NUT-BEARING TREES::

Almonds, Soft-Shell-Princess and Sultana. Both are prolific, soft-shelled and good. These are the varieties mostly cuitivated in Europe, and produce the bulk of the almonds of commerce. The trees are rapid, upright growers, and highly ornamental. 50 cents each, $\$ 5$ per dozen.
AImond, Hard-Shell. Fruit large; more hardy than the soft-shell. Not so showy, but still quite ornamental. 50 cents each

FIGS.

## 50 cents encin, \$5 per ciozenfy

Will easily produce a full crop in Texas, and are wortly attention from our ruit

## JAPAN PERSIMMONS.

Too thoroughly tested to be regarded as a novelty now. It has proved a success wherever cotton will grow, and no collection of trees, whether fruit or ornamental, should be without it. Home growntrees, \$1 each.

## GRAPES.

Brighton. Vine hardy, a rapid and vigorous grower; leaves large, thick, dark; quality best as compared with the finest table grapes: the fruit ripens early, along with the Hartford Prolific and before Delaware; is good as soon as fairly colored red, becoming very rich, but less vinous if allowed to hang long, 50 cents each, $\$ 5$ per dozen.
Agawam. Bunches medium to large, often shouldered; berries very large, pulp soft, sweet, sprightly, of peculiar aromatic flavor ; productive and of great vigor of growth; prefers long pruning. Ripens soon after the Concord. 35 cents each, $\$ 3.50$ per dozen.
Concord. Bunches large; berries very large, blue black, with bloont; skin thin, pulp dissolving, juicy ; a beautiful market variety; rampant grower and good bearer. Ripe middle of July. 15 cents each, $\$ \mathrm{t} .50$ per dozen.
Delaware. Bunches medium, berries medium to small, with red or pink skin, very thin; juicy, vinous and most delicate table grape; a very prolific bearer. 35 cents each, $\$ 3.50$ per dozen.
Catawba. The best late grape for this section. Bunches and berries of good size; fine coppery or purplish red, and when well ripened of delicious flavor; vigorous, early and a grand bearer." One to two weeks later than Concord. 25 cents each, $\$ 2.50$ per dozen.
Champion. Said to be the earliest black grape ; bunches and berries large, black; quality good; vine hardy, vigorous, productive. Valuable for market. 25 cents each, $\$ 2.50$ per dozen.
Black Spanish. (Lenoir.) Of the Herbemont class. Bunches medium to large, shouldered under favorable circumstances; on badly pruned or overloaded vines the bunches are loose and not shouldered; berries small, round; vine a fine grower and abundant bearer. 25 cents each, $\$ 2.50$ per dozen.
El Paso or Mission. Bunches very large, often weighing one and a-half pounds; berries medium to small, of dark amber color; flavor the best ; commands fancy prices on any market. Not quite hardy here; needs slight protection in winter. If well cared for, it will repay any one for the trouble. We consider it the best grape for Western, South.Western and Southern Texas. 50 cents each, $\$ 5$ per dozen.
Hartford Prolific. Bunches large; berries large, blue; flesh pulpy, musky, sweet. July ist. 25 cents each, $\$ 2$ 50 per dozen.
Rulander. Small, compact; purple, sweet, fine quality ; an excellent wine grape. 25 cents each, $\$ 2.50$ per dozen.
Scuppernong. As this is such a general favorite of all who are familar with it, we grow and sell a few. It has never proved a success from Central Texas, north and west, though sncceeding well in the southeastern portion of the State. 50 cents each.

Trinmph. Bunches and berries very large, white; vinous, excellent; a most showy variety; productive and perfecily free from rot. Becoming very popular. 75 cts. each Herbement. Bunch large, long, shouldered and compact; berries small, black, sweet, juicy, highly flavored; a fine wine grape. 35 cents each, $\$ 3.50$ per dozen.
Goethe. (Rogers' No. 1.) Bunches and berries large, greenish yellow, turning to pink at full maturity; very sweet, and of well defined aroma. August. 25 cents each, $\$ 2.50$ per dozen.
Ives' Seedling. Bunches large ; berries large, blue, skin thick; flesh pulpy, musky, sweet; vigorous grower and prolific bearer. Ripens early; an excellent whe grape. 15 cents each, $\$ 1.50$ per dozen.
Lindley. (Rogers' No. 9.) Bunches and berries large, red, and fine flavored. July to August. 35 cents each, $\$ 3.50$ per dozen.
Niagara. The famous new white grape. A cross between the Concord and Cassady. Bunches large; berries larger than the Concord, mostly round, light greenish white, slightly ambered in the sun; skin thick but tough, and does not crack; has a flavor and aroma peculiarly its own, much liked by most people; a fine market variety. Like all new fruits, the Niagara has been critically watched by all who are in any way interested in grapes, and no one has watched it more closely than we-if it proved to be as represented by its introducers, "the grape for the inillion," we wanted to know it; and if a failure, we did not care to push the sale of it. Our neighbor, Mr. W. F. Blandon, has abont 2,600 vines of the Niagara, which he bought from, the Niagara White Grape Company. The vines were loaded. At the time the Niagara came on the market, the price of grapes here had run down to five cents per pound, and slow also at that. The Niagara readily brought $125 / 2$ cents and the whole crop was closed out at that price, and was retailed at 15 and 20 cents a pound. where Concord and other varieties went begging at 6 to 8 cents. We would advise all who want a good white grape that will be sure to bear a heavy crop of fruit to try a few Niagaras. Good for trellises or arbor. July and August. 75 cents each, $\$ 8$ per dozen.
We are growing other varieties of grapes and will quote in our catalogue from time to time, such as prove worthy.

## BLACKBERRIES.

Dallas. This is described by Mr. Howell, of Dallas, as follows: "A native, discovered in Dallas several years ago. By culture it las been greatly improved in size, favor and productiveness, and to-day it stands at the head of the list for earliness, productiveness and absolute freedom from rust. The Central Texas Horticultural Society, at its meeting in Dallas on the 6th day of August, i884, adopted a resolution offered by J. M. Howell to name this berry the Dallas Blackberry." 15 cents each, $\$ \mathrm{I} .50$ per dozen, $\$ 4$ per 100 .
Early Harvest. A new variety from Southern Illinois. The bush is an upright grower ; canes strong, perfectly hardy, very productive; berries small and of good quality; very early, ripening several days before the Wilson's Early. Io cents each, \$I per
dozen, $\$ 4$ per 1oo.
Kittattiny. Very large, sweet and productive, where not affected by rust. This and the Dallas give a succession of fruit for six weeks or two months.

## STRAWBERRIES.

## 25 cents per dozen, 75 cents per roo.

## Crescent Seedling, Wilson's Albany, and Chas. Downing.

## RASPBERRIES.

Raspberries succeed well in most part of Northern Texas. The Black-Caps stand the hot, dry summer better than the Red-Caps. They should be planted in rich soil and well worked. We can furnish the Gregg, Mammoth Cluster and Doolitlle, black; and Turner and Philadelphia, red. \$1.50 per dozen.

## GOOSEBERRIES.

This fruit prefers a deep, rich, rather cool soil. The plants should be annually pruned, and if properly treated will produce abundantly.

## r 5 ceints each, \$1.50 per dozen.

Houghton's Seedling. An American seedling from Massachusetts. Vigorous, very productive, and free from mildew; pale red when ripe; of medium size and fine flavor. Downing. Of large size and fine quality; oval, greenish white; plant very productive.

## CURRANTS.

## Fxcept where noted, 15 cents each, $\$$ i.50 per ciozen.

Cherry. Very large, deep red, acid : growth stont and vigorous.
Red Dutch. Medium size, deep red; of rich acid flavor; very productive and reliable. Fay's Prolific. New; very large, deep red. Said to be the best variety grown; untried with us. 50 cents each.

## ASPARAGUS.

Conover's Colossal. A mammoth variety of vigorous growth, which we think the best for this climate. 50 cents per dozen, $\$ 1.50$ per 100.

## RHUBARB OR PIE PLANT.

This deserves to be ranked among the best early fruits in the garden. It affords the farliest material for pies and tarts, continues long in use, and is valuable for canning. Make the border very rich and deep.
Limmeas. Large, early, tender and fine; very best of all. Good roots, 25 cents each, $\$ 3$ per dozen.
30- We will be glad to give the benefil of our experience in making selections of fruit trees for any purpose, and will be pleased to furnish lists suitable for any locaticn or purpose.

## Ornamental Department.

## SHADE AND FOREST TREES.

ASH, Native. A well known tree. 50 cents each.
BOX ELIDHR. (Ash-leaved Maple.) Native; a good grower, and makes excellent shade. 50 cents each.
COTTONWOOD. For rapid, handsome growth and hardiness this has few equals. It thrives in any locality-in marshes or on dry sandy hills. Quite desirable for windbreaks or sidewalks. Trees 8 feet, 25 cents each, $\$ 2.50$ per dozen; 8 to 10 feet, well branched, 35 cents each, $\$ 3.50$ per dozen; heavy trees, delivered in Fort Worth, wenly,
(ATHA SPE
this tors fortry, we grow them extensively. Our trees are admired by hundreds of visitors for their uniform beauty, healthfulness and rapid, upright growth. The tree attains sixty to ninety feet in height, and in some instances three to foir feet in diameter. The timber is more durable than any other native tree. Several instances are recorded of Catalpa posts having been in use sixty to ninety years and still remaining sound and good. J. C. Teas, of Missouri, says: "Of all the trees that have been suggested as adapted to the formation of timber plantations, the Catalpa Speciosa stands preeminent. Its exceedingly rapid growth, its adaptation to almost all soils and situations, its wide range of latitude, extending from Canada to the Gulf of Mexico, its almost extraordinary success on the western and northwestern prairies, the ease and
certainty with which it is transplanted, its strong vitality and freedom from insects, the incomparable value of its timber for the most important as well as minor uses for which timber is needed, the almost imperishable nature of the wood when used for posts, railroad cross-ties and in other exposed situations, to say nothing of the handsome and stately appearance of the tree, and the unrivaled beauty of its flowers, all point to Catalpa Speciosa as the tree to plant."

Each Dozen.

"S Seedlings, to to 15 inches ....si.50 per roo, $\$ 10$ per $\mathrm{f}, 000$.
CATALADA Kempferi. Very hardy; has fragrant flowers. Transplanted trees same price as $C$. Speciosa; seedlings, 10 to 15 inches inches, $\$ 2$ per $100, \$ 12$ per 1,000 .
CATAMIA, Tea's Japanese Hybrid. A cross between Speciosa and Kampferi. It partakes of the characteristics of both its parents, having the fragrant, free-flowering habit of Kampferi, and the rapid upright growth of Speciosa. We have the above three varieties growing side by side, and it is difficult to tell whichone is the best-they are all wonderful growers and very ornamental. Prices for transplanted trees same as Speciosa; seedtings, 12 to 18 inches, $\$ 2$ per roo, $\$ 2$ per 1,000 . For large quantities, write for special prices.
ELM, White. The Elm is indigenous to every part of Texas, and will do well almost anywhere. Our trees are transplanted and the most of them have nice tops formed. For a handsome long-lived tree, this can be depended upon. 6 to 8 feet, 50 cents each, $\$ 5$ per dozen : 8 to 10 feet, 75 cents each, $\$ 7.50$ per dozen.
LOCUST, Black. Quite hardy anywhere in the State. 25 to 50 cents each.
MAPLE, Soft or Silver-Leaved. The very rapid growth, spreading branches and silvery foliage of this well known tree have induced its extensive planting for ornament and shade. It thrives in nearly all soils, and is one of the handsomest and most desirable of shade trees for this climate 6 to 8 feet, 50 cents each, $\$ 5$ per dozen ; 8 to io feet, well branched, 75 cents each, $\$ 7.50$ per dozen.
MULBERRY. Nearly all mulberries are hardy in Texas. They are rapid growers, long lived and handsome. The following we have found desirable for this locality.
Kussian. Dense dark green foliage; fine for hedges, wind-breaks, forest or shade ; the hardiest of all mulberries, and a prolific bearer of fair fruit ; is a fine tree to plant in quantity, either for fruit or defense. 5 to 7 feet, 50 cents each; 12 to 18 inches, $\$ 2.50$ per ron, $\$ 15$ per 1,000 .
Hick's Everbearing. We find this the hardiest everbearing mutberry that we have tried. It is a rapid, upright grower, and a contimous bearer. 25 cents each; 6 to 8 feet, 50 cents each.
Multicaulis. Non-bearing ; a beautiful shade tree, and largely grown for silk culture. 50 cents each.
PAULOWNIA Imperialis. Has immense leaves, and bears fragrant purple flowers very early: of rapid growth. \$1 to $\$ 3$ each.
POPLAR. All poplars are hardy, and rapid growers.
Balsam or Balin of Gilead. so cents each.
Carolina. (See Cottonwood.)
Lombardy. Pyramidal in shape, and a fast grower; the most graceful and stately avenue tree. They are not easily broken by the wind, as many suppose. 6 feet, branched. 25 cents each, $\$ 2.50$ per dozen; 8 feet, branched, 35 cents each, $\$ 3.5^{\circ}$ per dozen; 12 to 14 feet, extri, 50 cents each, $\$ 5$ per dozen.
Silver. Beautiful foliage. so cents each.
Bolleana. A Russian silver-leaved Lombardy Poplar, lately introduced. It possesses the beautiful silvery foliage of the Silver Poplar, and the regular upright growth of the Lombardy. The leaves are almost black.green on the upper surface, and white underneath; distinct from all others. \$i each.
SYCAMORE. Universally admired for its rapid, upright growth; fast becoming the popilar shade tree of our cities. 4 to 6 feet, 50 cents each; 6 to 8 feet, 75 cents each; 8 to 10 feet, $s$ each.
UMBRESIA CHINA. A native of Texas, and peculiarly adapted to our climate. Will make dense serviceable shade quicker than any tree we have. The most symmetrical tree in existence, every head being as perfect as an umbrella. Two year old trees that we set out sixteen months ago have formed heads eight to ten feet in diameter and so dense that the sun's rays never penetrate them. In spring, they are covstraight, thick dozen ; 7 to 8 feet, 75 cents each, $\$ 7.50$ per dozen ; 6 feet, 50 cents each, $\$ 5$ per doper 4 feet, 25 cents 15.50 per dozen. Price by the 100 or 1,000 of the different given on application.

## MISCELLANEOUS ORNAMENTAL AND FLOWERING TREES.

We have tested many of the ornamental trees of the north, but most of them are unsatisfactory, such as Cut-leaved Mountain Ash, Weeping Ash, Kilmarnock Weeping Willow, Camperdown Elm, Weeping Linden, etc. The trees named in the list below prove to be quite hardy. We hope to be able to add to this list every year.
WhLLOW. Babylonian. The well known weeping willow ; of rapidgrowth, hardy and graceful. 50 cents each.
Whldow, Wisconsin Weeping. Makes a large, beautiful tree; hardy. 50 cts each.
Whalow, Ammlaris. Of rapid growh; erect, and leaves singularly curled like a ring. 75 cents each.
PEACH, Poplat or Pyramidal. Grow to a height of twenty feet, in a compact form like the Lombardy Poplar. 50 cents each.
PEACH, Dwart: Of low, bushy growth; ricl, dark green, glossy foliage; fruit large and golden. 50 cents each.
PEACH, Blood-Leaved. Leaves blood red in the spring, changing to purple and finally to brown ; fruit white. 50 cents each.
PEACH, Double Flowering White. Flowers as double as a Camelia. The tree is a magnificent sight in spring. 50 cems each.
PEACH, Donble Red. A bright red variety of the above. 50 cents each.
PRUNUS Triloba. (Double Flowering Plum.) Of vigorous growth; flowers semidouble, of a delicate pink, upwards of an inch in diameter, thickly set on the slender branches. A choice and very attractive spring blooming plant. 50 cents each.
PRUNUS Pissardii. The most valuable of all purple-leaved trees. It retains its deep color throughout our warmest weather, and its leaves until mid winter. 75 cents eacl.
polpalis. See Shade Trees.
magnolias. See Evirgriens.

## EVERGREENS, BROAD-LEAVED AND CONIFEROUS.

A few years ago it was thought that evergreens in Texas, and particularly in West Texas. were a failure, but time has proved quite differently. It is true that such trees as the Pine, Spruce, latch, Yew, some of the Cypresses and Junipers, do not always give satisfaction to the planter, yet every garden can have the beautiful Arborvite, Retinospora, Wild Peach, Red Cedar, Box, Euonymus, and that grandest of all evergreens, the stately Magnolia; while in Southern and Eastern Texas, the Cape Jasmine, Oleander, Pittosporum, etc., grow to perfection.

While evergreens are often transplanted in the fall, yet we find that spring planting is much more successful, and we would advise our friends, particularly those in North Texas, to plant in the spring, say from February ist to March 15 th.

Never expose the roots to the air or sunt ; plant the dirt firmly around the roots, water and mulch, and they will be as sure to grow as peach trees
ARBORVITEE, Golden. Beautiful compact tree of a golden hue. The most desirable; will never out-grow its compact form. 12 to 15 inches, 25 cents each; 15 to 20 inches, 50 cents earll; larger plants, $\$ 1$ to $\$ 2$ each.
ARBORVTAE, Hybrid Golden. Beautifit; nearly as compact as the Golden, and makes a more rapid grow th. 25 to 75 cents each.
ARIBORVITAL, Chinese. Fastergrower than the above, but not so compact. Bears priming well, and can be made a beautiful tree. 25 to 50 cents each.
BOX, Tree and Dwarl. Beantiful for hedges or single specimens. Should be planted in clay or black soil ; do not thrive in sand. 25 to 75 cents, according to size.
CUPRESSUS Pyramidalis. Dark green dense foliage; very compact and pyramidal, like the Lombardy Poplar. 50 cents to $\$ 1$ each.
CUPRESSUS Horizontalis. Rapidgrowing; brancles spreading. 75 cts . to $\$ 1$ each. CAPE JASMINE. Universally admired for its beautiful glossy folinge and fragrant white flowers. Perfectly hardy south of here, but necds protection in winter in this latitude. Nice plants, so cents each; large, $\$ 1$ each.
CEDAR, Native Red. Makes a beautiful tree when pruned so as to make a compact growth on cents to $\$ 1$ each.
CEDRUS Libani. (Cedar of Lebanon.) Vigorous, wide spreading horizontal branches, foliage dark green ; massive and very picturesque. $\$ 1$ to $\$ 2$ each.
CEDRUS Deodara. The great cedar of the Himalayan mountains. Of pyramidal form; foliage light silvery yreen; a magnificent tree. $\$ 1.50$ to $\$ 3$ each, according to
$s^{\prime}$ ze.

LIBOCEDRUS Decurrens. A magnificent rapid growing tree; foliage in form of fans. Attains the height of 50 to 80 feet. $\$ 1$ to $\$ 3$ each.
MAGNOLIA Grandifiora. The handsomest of all sonthern broad-leaved evergicens, and well known. They are indigenous to Southern Texas and do well all over the state. There are a few handsome specimens in Fort Worth that have bloomed two or three seasons. Ifoot, 75 cents each ; 2 feet, $\$: .50 ; 4$ feet, $\$ 2.50$ each.
MAGNOLIA Fuscata. (Banana Shrnb.) A dwarf growing variety; in April and May it is covered with a profusion of small flowers, exhaling a most exquisite fragrance, similar to a ripe banana; a favorite. 8 to 10 inches, bushy, $8 \mathrm{f} ; 12$ to 15 inches, $\$ 1.50$.
MAHONIA Aqnifolinm. A low growing shrub, with purplish green, shining, prickly leaves, and bearing showy, bright yeliow flowers in spring. 50 cents each.
OLEANDER. Well known; grows and blooms well out of doors in this latitude in summer, but should be taken up in the fall and kept in the house or a light cellar. It will survive the winter with but slight protection 200 miles south and east of Fort Worth. Large fine plants, 75 cents to $\$ 1$ each; small plants in spring, 25 cents each.
Splendens. Donble pink; the best of its color, and very fragrant.
Single White. The hardiest and best bloomer.
PITTOSPOLEUM Tobira. Glossy dark green leaves and fragrant cream colored flowers; about as hardy as the Cape Jasmine. 50 cents each.
PITROSPORUM, Variegated. Leaves green, margined white. 50 cents each.
RETINOSIORA. (Japan Cypress.) A pretty class of small evergreens. Bear transplanting well and are quite hardy. 50 cents to $\$ 1.50$ each.
Plimosa. A hardy, graceful, rapid grower, with delicate glaucous foliage.
Squarrosa. Another rapid grower ; has a round bushy head, covered with numerous small leaves of a whitish green tint ; densely branched.
Aurea. Gold tinted; very pretty.
WILD PEACH. (More correctly Evergreen Cherry.) One of the prettiest evergrecn trees we have. They have all been transplanted, giving them more roots, so that they will bear transplanting again with little loss. 8 to ro inches, bushy, 25 cents each.
PRIVET. The Privets are almost evergreen here, particularly the Japan and California, which frequently hold their leaves until February. See Shrubs.

## HEDGE PLANTS.

PRIVET, California. Nearly evergreen; a strong growing pyramidal sirub, with bright green leaves and white flowers. This is the most desirable and beautiful hedge plant; grows rapidly and can be trimmed in any shape. \$1o per 100.
PRIVET, Common Enropean. Dark green and smaller leaves than the California.
ARBORVITAE, Chinese. Evergreen; fast growing variety. Makes a beautiful ornamental hedge when neatly pruned. 18 to 24 inches, $\$ 20$ per 100 .
OSAGE ORANGIS, Rapid in growth and very thorny. $\$ 7.50$ per roo.
PYRACANTHA or lsvergreen Thorn. \$12.50 per 1,000.
ye we do not grow the last two named, but can supply them on short notice. Special prices on large quantities.
BOX, Tree and Dwarf. Makes a beantiful evergreen hedge. Will not succeed in sand, but flourishes in clay or black land. 25 cents each, $\$ 20$ per 100.

## ORNAMENTAL GRASSES.

ARUNDO Donax Variegata. (Ribbon Grass.) This scarce and beautiful variety is one of the most stately of silvery variegated reed-like plants, and one that can be used either as a single specimen or ingroups, its graceful foliage, creamy white and green striped, contrasting well with other foliage plants. 50 cents each.
PAMPASGRASS. A most ornamental plant, with silvery phome-like spikes of flowers; very hardy, and thrives in almost any ordinary rich soil. 53 cents each.
ERIANTHUS Bavenmae. Attains the heigit of ten or twelve feet, throwing up numerous flower spikes of a grayish white color; blooms profusely and remains in bloom a long time; needs space to show its merits. The plumes, like those of the Pampas Grass, make elegant winter decorations, 50 cents each.
EULALIA Japonica. A hardy perennial from Japan, with long narrow leaves, striped with green and white; it throws up stalks four tosixfeet high, terminating with a cluster of flower spikes, on which the individual flowers are arranged; the flowers are surrounded with long silky threads, which when fully ripe or when placed in a warm room, expand, giving the whole head a most graceful and beautiful appearance, not unlike that of an ostrich feather curled. 50 cents each.
EULALIA Japonica Zebrina. Striking and distinct. Unlike most plants with variegated foliage, the striping or marking is across the leaves instead of longitudinal, the leaves being striped every wo or three inches by a band of yellow one-half inch wide. In the fall it is corered with flower spikes similar to that of E. Japonica. 50 cents each.

Hydrancea lemin ulata Giandifora.

## HARDY FLOWERING SHRUBS.

## Hxcept winere noted, 25 cents each; large plants, 50 cents each,

ALMOND, Donble flowering White. One of the most beatiful of our early flowering shrubs. 50 cents each.
AIMONI, Donble Red. A variety with rose-colored flowers.
ALTHEA. (Rose of Sharon.) We are cultivating several varieties of this beautiful shrub, differing in color and shape of flower. They are hardy, of easy cnltivation, and desirable on acconnt of their blooming during the autumn months, when there are but few other flowers.
Double Red.
Double White.
Donble Purple.
Flegantissima. Semi-double pink; large flower and very free bloomer.
Variegated. Leaves conspicuously margined creamy white. Hoids its color well all througl the summer ; flowers purple, small. 50 cents each.
BUDIEELA Lindleyana. Pale blue flowers, borne in long pendant racemes. Good grower and constant bloomer.
CRAPE MYRTLF. Truly a southern shrub, and the most showy summer bloomer we have. So well known as to need no description.
Pink. 35 cents each.
Purple. 35 cents each.
New Crimson. 50 cents each.
White. 75 cents each.
CAIMCANTHUS Floridus. (Sweet-scented Shrub.) L.eaves soft, downy beneath; fowers fragrant like strawberries, double and of chocolate color. 50 cents each.
CURRANT, Yellow Flowering. Blooms early in spring.

CYDONIA JAPONICA. (Pyrns Japonica or Japan Quince.) Scarlet ; an old favorite laving a profusion of bright scarlet foners in early spring. One of the best early shrubs we have; no tlower garden should be without one or more.
DEUTZIA. A class of very useful and popular flowering shrubs, of compact and bushy growth.
Crenata. Double flowering; a handsome variety. Flowers white, tinged rose.
Crenata fi. pl. Aba. New; flowers pure white.
Gracilis. Flowers pure white, bell shaped; dwarf and graceful; is often forced by florists for its pretty flowers, which a, pear with very little heat in the winter
Pride of Rochester: Double pink ; fine.
HONEYSUCKIE, Tartarian Upright or Mush. A vigorous shrub of upright habit, suited to almost any soil and exposure; leaves good size and rich green; flowers pinkish, coming early, before the leaves, and very fragrant. 35 cents each.
HYDRANGEA. Vigorous, spreading shrubs with large showy leaves and great panicled flowers; well known and valuable. Thrive best if planted in partial shade and somewhat moist ground.
Otaksa. Flowers pink, occasionally blue, in immense trusses. 50 cents each.
Panienlata Grandiflora. Of spreading form, bearing immense pyramidal panicles of white flowers, more than a foot long, which change to pink, and finally to purple. Blooms from June to frost ; one of the best ornamental shrubs, and popular everywhere. 50 cents each.
Thomas Hogg. Plant not so strong as above. Abundant white flowers in immense heads, often ten to fifteen inches in diameter; the best of its class, and very fine for pot culture. 50 cents each.
JASMINE, Catalonian. Foliage beautiful; fragrant white flowers. Hardy here
LILAC. Well known, hardy and fragrant. Grow well in almost any soil and are very beautiful
Purple. The well-known variety; good bloomer.
White. Rich glossy foliage; flowers pure white. 75 cents each.
Persian Purple. Has a heavy crop of blooms in the spring, and then blooms occasionally through summer and fall. 50 cents each.
PHIIADEIAPHUS. (Syringa or Mock Orange.) Strong growers; beautifnl and showy.
Grandiflora. Flowers very large, slightly fragrant. 35 cents each.
Coronarins. White; fragrant. 35 cents each.
Coronarins fi. pl. Semi-double flowers. 35 cents each.
SPIRPA. A very extensive class of flowering shrubs, embracing many forms and colors of blooms; popular and good.
Billardii. Large spikes of deep pink flowers; profuse and perpetual bloomer; fragrant.
Callosa. Flowers pink: everblooming.
Callosa Alba. Flowers white ; everblooming, of dwarf growth; very neat and des rable. 35 cents each.
Callosa Siperba. Flowers pale flesh.
Prunifolia. Flowers smalk, pure white, very double, produced in great profusion, upon long slender branches; blooms early in spring. 35 cents each.
Reevesii. (Bridal Wreath.) Single white.
Reevesii fl. pl. Large round clusters of double white flowers, covering the whole plant. One of the best; blooms in spring.
Thnnbergii. Low growing, with beautiful foliage; abundant white flowers. One of the most charming of all low growing shrubs. 50 cents each.
POMEGRANATE. Flowering and fruting. Perfectly hardy south of this latitude. Here they are killed to the ground during the coldest winters, but grow ont again in the spring.
Donble White.
Donble Red.
SNOWBATAL. A favorite old shrib, producing large globular clusters of white flowers. so cents each.
SNOWBERRY. Pink flowers in spring, and quantities of large white waxy berries in autumn.
WILGEIIA. Very useful shrubs, bearing pretty flowers at a time when bloom is scarce. Amabilis. Of robnst growth ; pink, very profnse bloomer. Spring and fall.
Amabilis Alba. Flowers white, turning pink soon after opening.
Nivea. Rather dwarfish habit; flowers pure white, in spikes.
Rosea. Fine rose-colored flowers inspring; one of the best and most popular Wiegelias. Rosea Variegata. A variety of the preceding, with variegated foliage; of dwarfish habit and an exquisite bloomer. 50 cents each
PRIVETI. A class of shrubs or low trees, fine both in foliage and flower.
California. Rich glossy foliage ; white flowers
Japan. Fine shrub or low tree ; foliage broad ; panicles of white flowers, followed by purple berries. 50 cents each.
Common European. The leaves are dark green and smaller than those of the preceding varieties. Beautiful as a single shrub or for hedging.

## HARDY CLIMBING PLANTS.

## Exccpt where noted, 25 cents each.

AKEBIA Quinata. A Japanese climber with reddish brown flowers. 35 cents each. ARISTOLOCHIA Sipho. (Dutchman's Pipe.) Strong growing; las interesting, roundish light green leaves, eight or ten inches in diameter, and curious pipe-shaped, yellowish brown flowers. 75 cents each.
AMPELOPsIS Yeitchii. A small leaved variety, which will cling closely to the smoothest walls or boards; foliage very rich and fine; a desirable new variety. 50 cents each.
AMPELOPSIS Quinquefolia. (American Ivy or Virginia Creeper.) A rapid climber, with large five-lobed leaves, which change to the brightest scarlet or crimson in autumn.
BIGNONIA Grandiflora. (Trumpet Creeper.) A splendid climber; vigorous and hardy, with clusters of large scarlet, trumpet-shaped flowers all through the summer and autumn. During the severe drouth in Western Texas in I886, we saw this growing and blooming beautifully without water or care, and where nearly all other vegetation was parched up.
HONEYSUCKLASS. Who does not know and love the sweet Honeysuckles! No other climber is so popular.
Chinese Evergreen. White, buff, and pink; delightfully fragrant; an old reliable sort.
Golden Veined. (Aurea Reticulata.) White and cream color; foliage variegated with yellow veins and blotches. Very pretty at all seasons of the year. 35 cts . each.
Hall's. White and buff; very fragrant and a constant bloomer. One of the best. 35 cents each.
Coral. A well known strong growing variety, with showy scarlet flowers.
Yellow Trumpet. Similar to above, differing only in color. 35 cents each.
IVY, English. The well known evergreen climber. Of slow growth, but hardy.
JASMINUM Nudiflorum. Produces light yellow flowers in early spring. 35 cts. each.
Officinalis. Flowers white, fragrant. 35 cents each.
PERIPIOCA Graeca. Grecian Silk Vine; rapid grower, flowers purple.
CLIMBING ROSES. Several varieties, Noisettes, etc. See Roses, page io.
WISTARIA, Chinese Purple. A beautiful climber of rapid growth, and producing long pendulus clusters of pale blue flowers. When well established makes an enormous growtlı; it is very liardy and one of the most superb vines ever introd ced. 35 cents each.
Chinese White. Flowers pure white; beautiful and rare. 75 cents each.

Honeysuckle.
